

Dear _____,

The City of Dixon's Water Distribution Division is currently updating its list of certified backflow testers that do work in the City of Dixon. We are reaching out because we will be adding qualifying testers to a sample directory that is sent out to customers when their device fails and which will be posted on the City's website. In order to qualify for this list, a backflow tester will need to have an AWWA Backflow Prevention Assembly General Tester Certification, Backflow Test Kit Accuracy Certification, and a Business license in the City of Dixon.

If you would like to be added to our list, Please respond by March 31st with proof of all 3 documents to Judson@cityofdixon.us or Ddunn@cityofdixon.us.

If you have any questions, please call contact Josh Hudson at 707-678-7050 EXT 5501 or email Judson@cityofdixon.us.

Thank you,

Josh Hudson

Operations Supervisor - Water Distribution Division
